

Swing Trading Screener - Nifty 150

A **8-Factor Technical + Fundamental Screener** for Indian stocks, deployable on Streamlit Cloud.

8-Factor Framework

Technical (4 Points)

#	Factor	Condition	Points
1	Trend	Price > 50 DMA > 200 DMA	0-2
2	ATR%	14-day volatility (filter only)	-
3	RS vs Nifty	6M Stock Return - 6M Nifty Return > 0	+1
4	Volume	Today' s Volume > 20-day Average	+1

Fundamental (4 Points)

#	Factor	Condition	Points
5	ROE	> 15%	+1
6	PAT Growth	Earnings Growth > 15%	+1
7	Debt/Equity	< 1.0	+1
8	Institutional Holding	> 25% (FII+DII proxy)	+1

Max Score: 8/8

Deploy on Streamlit Cloud

1. Create a new GitHub repo
2. Upload these 3 files:
 - app.py
 - requirements.txt
 - README.md
3. Go to share.streamlit.io
4. Connect your GitHub repo
5. Deploy! 🚀

How to Use

1. Open the deployed app
2. Set filters in the left sidebar:
 - **Technical:** Trend Score, Max ATR%, Min RS, Volume requirements
 - **Fundamental:** Min ROE, Min PAT Growth, Max D/E, Min Institutional %

- **Combined:** Minimum Total Score (0-8)
3. Click “**Run Screener**”
 4. Wait 3-4 minutes for data fetch
 5. Get ranked swing trade picks with full factor breakdown!

Stock Universe

Nifty 150 = Nifty 50 + Nifty Next 50 + Nifty 100 top stocks

Important Note on FII/DII Data

yfinance (free API) provides **Institutional Holding %** as a combined metric, but does **NOT** separate FII vs DII for Indian stocks. For exact FII+DII breakdown and buying trend analysis, integrate NSE/BSE data APIs (Prime Database, StockEdge, Trendlyne, etc.).

This app uses `heldPercentInstitutions` from yfinance as a proxy for FII+DII combined holding.

Author

Built for swing traders who believe in **momentum + relative strength + quality fundamentals**.
